1. The indicated allowability of claim 12 is withdrawn in view of the newly discovered reference to Russell et al. (U.S. Pat. No. 2,458,427). Rejections based on the newly cited reference follow.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 12 is rejected under 35 U.S.C. 102(b) as being anticipated by Russell et al. (U.S. Pat. No. 2,458,427).

Russell discloses a tool in the form of a molding die. The die comprises a first member 5 and a second member 6. A spacer member 7 is coupled to the first and second members. The spacer member cooperates with the first and second members to form a tool having a cooling passage 9. The spacer is attached to the first and second members by a brazen-welded, connection (see cl. 2, ll. 33-36).
